

IMC 5 Gallon Pail Mixing Cart

IMC Metering Systems

IMC 5 Gallon Pail Mixing Cart

General Description:

Designed specifically to hold and mix 5 gallon pails of In Mold Coating. This compact, easily portable unit is quick to hook-up and changeover. Four swivel casters allow you to position the mixer wherever it's needed and tucks away neatly when not in use. An air operated mixing motor drives low shear, mixing blades at a fixed speed which you set using a flow control. The mixer RPM is displayed on the front of the control panel along with the mixing timer. Set the mix time and speed and walk away as the equipment takes over and provides you a perfectly consistent mix every time. EMC 2's low maintenance, high efficiency design frees plant personnel for other projects.

Features:

- Consistent, reliable mixing
- Low shear mixing blades to minimize heat
- Simple hook up with intuitive controls
- Fully adjustable mixing speed and time
- 4 swivel casters for easy maneuvering
- Air operated lever valve raises or lowers mixer
- Standard components
- Easy to use with any in-mold coating system

Specifications:

- Hold standard 5 gallon pails
- Size 24" x 24" x 60"
- Air-operated mixer (150 RPM maximum)
- 110 volt operation (Timer and tachometer)
- 3/8" Air supply connection
- Four swivel casters

Options:

- Electric drive mixer
- Explosion proof
- Alternative voltages
- 55 Gallon drum size
