Single Component Guns

M-4004B Single Component Windshield Urethane Dispense Gun

General Description:

The M-4004B Windshield Urethane gun is a specialty valve based on the highly successful 4000 series valve line. Featuring a removable, replaceable polyethylene tip, this gun is unsurpassed as a windshield urethane applicator. The tips come in varying lengths and sizes and each tip has a precision shaped outlet to form the bead shape. The "divorced" design allows the visual inspection of open/closed function and prevents material leaks from affecting the air actuator and other air components upstream of the gun.

Features:

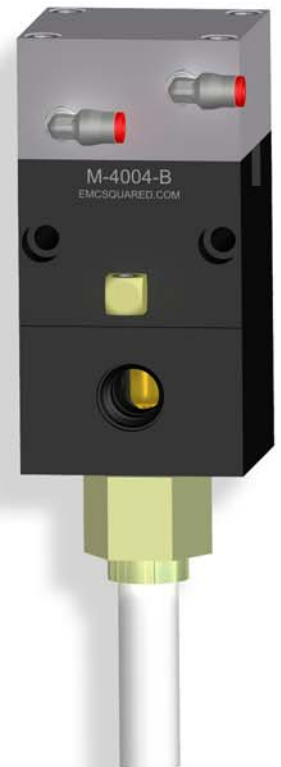

- Compact design
- Standard seal cavity (Many sealing materials available)
- Wet Seal design
- High Flow capability
- Standard Air cylinder (Compact Brand)
- Bolt holes provided for easy mounting
- Light weight aluminum construction
- Semi-divorced design keeps material separate from air
- Long life expectancy
- Proprietary needle and seat design
- Multiple tip choices for adhesive shape

Specifications:

- Two-way shutoff
- Rated at 5000 PSI working pressure
- 64:1 Air to Material ratio
- Hardened Steel Seat & Needle
- SAE straight thread "O" ring ports

Options:

- Air-operated trigger handle easily added for hand-held operation
- Electric-operated trigger handle easily added for hand-held operation
