

5 Gallon Pail Racks

Material Supply Systems

5 Gallon Pail Racks

General Description:

The pail rack option on all of EMC² dispensing systems is the cleanest, easiest way to supply adhesive to the metering units. The Pail Rack is designed to hold (2) 5 gallon pails in a position to gravity feed the metering system. Hold down straps, all fittings and hoses required to make the connections are included. Pails are usually used in portable applications or when volumes are so low that 55 gallon drums are not warranted.

Features:

- Angled pails allow pails to fully empty
- Fittings to adapt to almost any pail design
- Built in supports for plastic pail spouts
- Designed to easily mount on existing metering units
- Hold down straps
- Desiccant cartridge feeding pails
- Includes awl to perforate pail for desiccant fitting

Options:

- Low level sensors
- Single pail rack
- Material heat exchangers
- Conditioning Hoses
- Temperature Monitoring
- Custom designs available on request
