

# ACCESSORIES

The Autopurge stand allows the operator to holster the dispense gun in between parts and purges material at preset intervals to insure that the adhesive doesn't harden in the mixer. The timers are fully adjustable so the stand will work with any adhesive open time and can be used with any of our standard dispensing equipment.

## Shot Timer

The Shot Timer is designed for allowing the operator to dispense a preset amount of adhesive based on time. Adjusting the time and flow rate of your dispense system guarantees a consistent "shot" size or adhesive weight, this preset feature is used on each part and takes the operator out of the equation. The shot timers will work with any adhesive open time and can be used with any of our standard dispensing equipment.

## Static Mixers

EMC<sup>2</sup> stocks and supplies thousands of static mixers for our customers. We sell both TAH and Conprotec brands of dispensing mixers with a large inventory of both brands. Most orders shipped same day.

## Mixer Shrouds

EMC<sup>2</sup> has the largest variety of mixer shrouds in the dispensing business. Many of our shrouds are designed and manufactured in house at EMC2 Inc.. We also carry TAH & Conprotec brands of shrouds in stock and shipped same day.

## Consistent Pressure Regulator

The Consistent Pressure Regulator features smooth and consistent pressure regulation with easy-turn adjustment. Easy –access seat plug permits immediate service access to the regulator's ball and seat. Patented "floating" ball and seat design maintains proper regulation, even during significant fluctuation in line pressure.
