

M-4008B

Mastic Dispense Gun

M-4008B Single Component Mastic Dispense Gun

General Description:

The M-4008B Mastic gun is a specialty valve based on the highly successful 4000 series valve line. The compact design and reliability of this valve make it a must for dispensing mastics. Used by itself on a robot or mounted in banks when dispensing drops, this gun outperforms the competition time after time. Uniquely designed to mount on a round extension tube, this gun is a model of versatility. The "divorced" design allows the visual inspection of open/closed function and prevents material leaks from affecting the air actuator and other air components upstream of the gun.

Features:

- Compact design
- Standard seal cavity (Many sealing materials available)
- Wet Seal design
- High Flow capability
- Standard Air cylinder (Compact Brand)
- Bolt holes or pipe adapter provided for easy mounting
- Light weight aluminum construction
- Semi-divorced design keeps material separate from air
- Long life expectancy
- Proprietary needle and seat design
- Multiple tip choices

Specifications:

- Two-way shutoff
- Rated at 3000 PSI working pressure
- 32:1 Air to Material ratio
- Hardened Steel Seat & Needle
- SAE straight thread "O" ring ports

Options:

- Air-operated trigger handle easily added for hand-held operation
- Electric-operated trigger handle easily added for hand-held operation
